		For all strategies except the first S&P 500 Annual Point-to-Point with cap, and first S&P 500 performance triggered, initial rates are guaranteed for the duration of the surrender charge period. Client has the option to elect individual indexing methods or choose a predetermined “Allocation Model.” An Allocation Model is a preset combination of strategies and allocation percentages and must be elected at issue. Client has a one-time opportunity to reallocate from the model into other available strategies, not including other Allocation Models, prior to the start of each policy year. Allocation Model 1 offers the following term-guaranteed rate allocation percentages: S&P 500 with Cap: 20%; Barclays Global Trailblazer with Par Rate: 5%; S&P Multi-Asset Risk Control Managed 5 with Par Rate: 20%, US Multi-Asset Diversified 5 with Par Rate: 20%, US Strategic Balanced Asset 8 with Par Rate: 15%, US Balanced Asset 10 with Par Rate: 5%, US Daily Risk Managed 12 with Par Rate: 10%, and Fixed Rate: 5% Allocation Model 2 offers the following term-guaranteed rate allocation percentages: S&P 500 with Cap: 40%; Barclays Global Trailblazer with Par Rate: 5%; S&P Multi-Asset Risk Control Managed 5 with Par Rate: 15%, US Multi-Asset Diversified 5 with Par Rate: 15%, US Strategic Balanced Asset 8 with Par Rate: 10%, US Balanced Asset 10 with Par Rate: 5%, US Daily Risk Managed 12 with Par Rate: 5%, and Fixed Rate: 5% Allocation Model 3 offers the following allocation percentages: Barclays Global Trailblazer with Par Rate: 5%; S&P Multi-Asset Risk Control Managed 5 with Par Rate: 25%, US Multi-Asset Diversified 5 with Par Rate: 20%, US Strategic Balanced Asset 8 with Par Rate: 25%, US Balanced Asset 10 with Par Rate: 5%, US Daily Risk Managed 12 with Par Rate: 10%, and Fixed Rate: 10% Premiums allocated to a term guaranteed strategy cannot be moved to other Allocation Options during the Initial Guarantee Period, unless the one-time opportunity to move from a Model Allocation is exercised. Performance Triggered indexed strategy credits the specified rate if the index has positive indexed performance or remains flat.☐
