Unleash the Power of a Fixed Index Annuity

What is a Fixed Index Annuity (FIA)?

A Fixed Index Annuity (or FIA) provides growth strategies offering fixed-rate returns and indexed interest options with performance-based returns tied to an underlying index, subject to caps and participation rates. When funds are placed into an indexed interest option, funds may grow, in part, based on the performance of the underlying index. Because your money is not directly invested in the market, your principal remains protected, you will not lose money due to stock market performance and interest credited will never dip below zero.

Similar to other FIAs, Enduris is a long-term contract designed to help achieve future financial milestones. Your funds typically grow tax deferred, are protected from market downturns and provide you the flexibility to distribute your premium dollars among the fixed interest or available S&P 500® indexed interest options.

Enduris' Additional Stand Out Features Offer an Extra Level of Safeguarding and Potential

A 6 Year Guaranteed CAP Rate* can provide greater stability.

This Guaranteed CAP Rate will not decrease during the 6 Year surrender charge period - providing you with certainty and peace of mind.

The Best Entry feature is designed to protect against early downward index movement.

If the S&P 500® declines significantly shortly after issue, the Enduris annuity adjusts your index starting value to a new lower level, enhancing your growth potential during your first index option period.
(See pages 4 and 5 for details)

The Enhanced Participation (EPAR) Indexed Interest Options offer additional upside growth potential.

The EPAR Indexed Interest Options offer you the chance to capture a greater percentage of growth if the S&P 500® Index performs well during the index option period. (See page 7 for details)

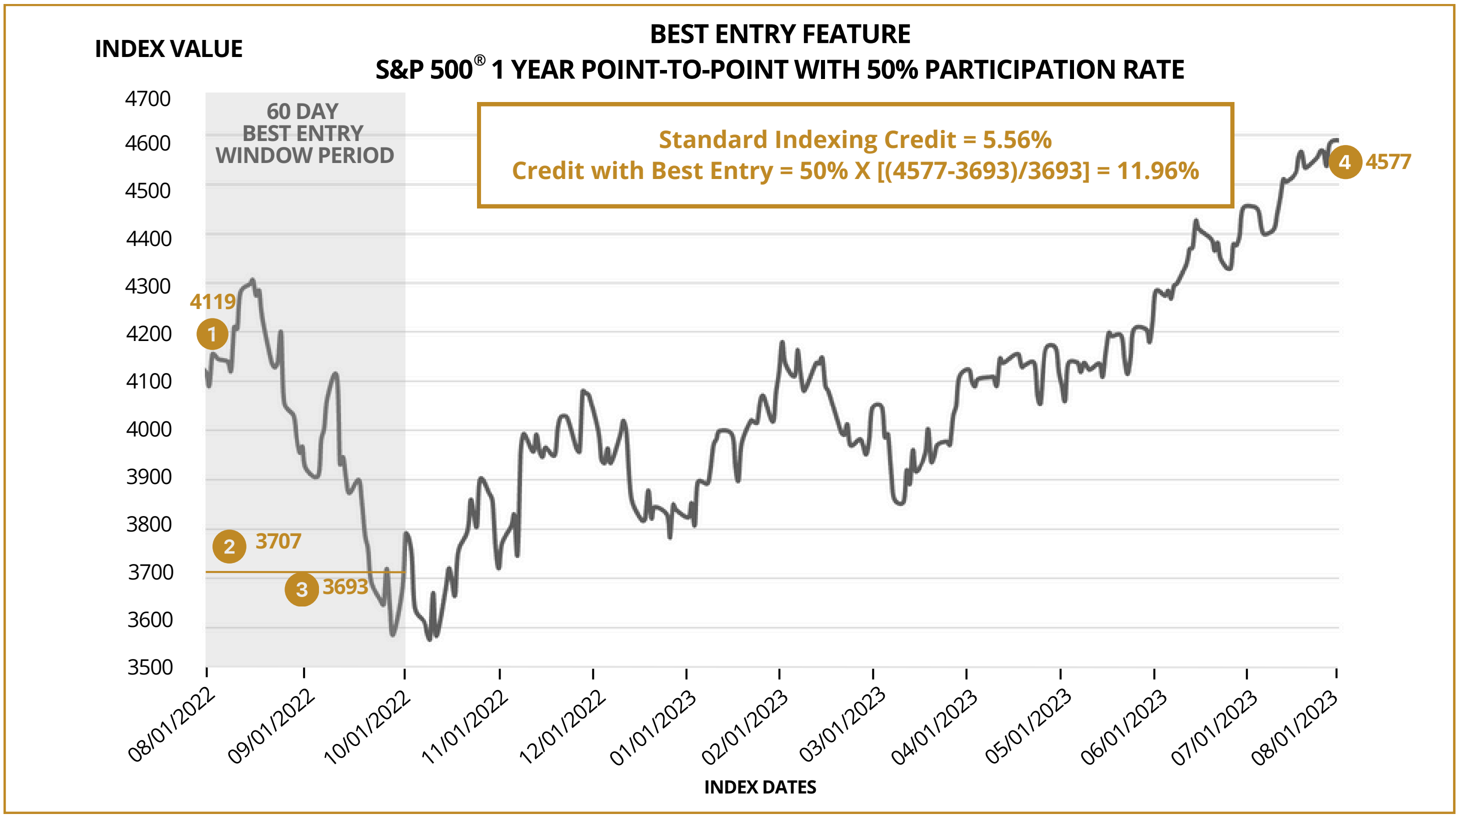
*Note: The 6 Year Guaranteed CAP is available only on the 1-Year Point-to-Point with 6 Year Guaranteed CAP Rate Indexed Interest Option. The Guaranteed CAP rate stays fixed during the 6 Year surrender period, which includes 6 one-year crediting periods. Afterward, it may change for future crediting periods. Funds can be allocated to this option only at Contract Issue, with no transfers in or out, or reallocations from other options, allowed during the surrender period.

Understanding the Best Entry Feature

Index performance is generally calculated based on the difference in index values between the first day and last day of an index option period. The greater the positive spread, the greater the positive index return rate may be, subject to a cap or participation rate.

Here's how it works

For purposes of calculating the index credit amount with Enduris FIA, the starting Index Value will be reduced if the index falls more than 10%* (the Trigger Rate) during the Best Entry Window period (currently 60 days* from the policy issue date). This may provide a better opportunity for gains.



Key Reference Points

1	4119	This is the Initial Starting Index Value. This value will be set at the start of your Contract.
2	3707	This is the Trigger Rate Value. If the index falls below 3707 within the first 60 days, a new Best Entry Starting Value will be set.
3	3693	In this example, 3693 becomes the new Best Entry Starting Value. It is the first decrease within the Best Entry Window period that drops below the Trigger Rate Value.
4	4577	This is the Ending Index Value. It is set at the end of your index option period.

*The index value used for determining what the new starting index value will be and whether the Trigger Rate has been met will be as of market close. The Trigger Rate and Best Entry Window declared in the Contract will not change. Please review your Contract for the most up-to-date terms and conditions.

This example is hypothetical and for illustrative purposes only. It does not reflect the outcome of any actual person. Individual results may vary. The above example illustrates an indexed interest option with a participation rate. The results would be different if another indexed interest option was selected, such as an option with a CAP rate. Data Source: S&P 500® from August 1, 2022 - August 1, 2023.

Best Entry Feature in Action

Utilizing the data points provided on page 4, the example below demonstrates the potential benefit you could receive from the Best Entry feature if the Index Value falls more than 10% in the first 60 days from policy issue.

For this example, it is assumed $100,000 of premium is placed into the S&P 500® 1 Year Point-to-Point Indexed Interest Option with a 50% PAR rate at the beginning of the contract term.

Standard Index Crediting

$100,000 Premium | **$5,560 Credited Interest** = **$105,560 End of Index Option Period Crediting Amount**

($100,000 premium) X (1 + Standard Index Crediting rate of 5.56%) = $105,560

Best Entry Crediting

$100,000 Premium | **$11,960 Credited Interest** = **$111,960 End of Index Option Period Crediting Amount**

($100,000 premium) X (1 + Best Entry Index Crediting Rate of 11.96%) = $111,960

Important information to know about the Best Entry feature

- If the S&P 500® index declines during the Best Entry Window period, but does not penetrate the Trigger Rate value, your starting value would not reset.
- The Best Entry feature only applies during the Best Entry Window period, and will terminate upon termination of the Contract.
- The Best Entry feature applies only to the first index option period following policy issue. It does not apply to any periods thereafter. It also does not apply to the Fixed Interest Option.
- The Trigger Rate and Best Entry Window period stated are subject to change at any time prior to policy issue. The Trigger Rate and Best Entry Window declared in the Contract will not change. Please review your Contract for the most up-to-date terms and conditions.

This example is hypothetical and for illustrative purposes only. It does not reflect the outcome of any actual person. Individual results may vary.
Data Source: S&P 500® from August 1, 2022 - August 1, 2023. Some values may be rounded.

Allocating Your Premium Dollars

With a Fixed Index Annuity, your initial premium can be allocated, in any combination, to the Fixed Interest Account or any of the S&P 500® Indexed Interest Options available with Enduris.

Fixed Interest Account

The Enduris Fixed Interest Account earns interest daily at a fixed interest rate set at issue and is guaranteed for 1 year. A new fixed interest rate will be declared for each subsequent contract year and will apply to the amount allocated to the Fixed Interest Account as of the beginning of that contract year.

Indexed Interest Options

These strategies utilize a formula linked to one or more published indices. When the underlying index increases (based on the starting point to the end point of the index option period), the funds in the indexed interest options are credited on a portion of that growth, subject to participation rates and cap rates. When the index decreases, the funds are credited with nothing for that period. Because the principal is protected from market volatility, interest crediting will never be less than zero due to index declines.

Indexed Interest Options available with Enduris FIA

- S&P 500® 1 Year Point-to-Point with Participation Rate
- S&P 500® 2 Year Point-to-Point with Participation Rate
- S&P 500® 1 Year Point-to-Point with Enhanced Participation Rate (EPAR)
- S&P 500® 2 Year Point-to-Point with Enhanced Participation Rate (EPAR)
- S&P 500® 1 Year Point-to-Point with CAP Rate
- S&P 500® 2 Year Point-to-Point with CAP Rate
- S&P 500® 1 Year Point-to-Point with 6 Year Guaranteed CAP Rate

Understanding how CAPS and PARS impact indexed interest crediting

Point-to-Point is the duration period used to determine index performance.

A CAP rate is the maximum percent limit (or CAP) that can be used to credit interest to your Account Value.

Example: You place $100,000 in an indexed interest option with a 10% CAP rate. If the underlying index grows by 20% during the defined credit period, your Account Value will be credited 10%, or $10,000. If the underlying index grows by 9%, you will be credited 9% or $9,000.

The Participation Rate, or PAR Rate, is a percentage of the index return that is credited to your Account Value.

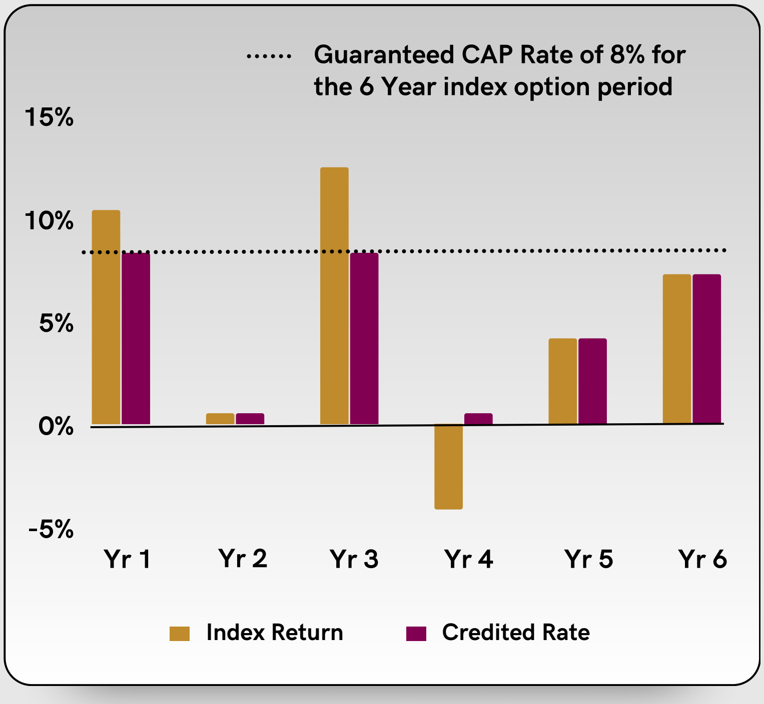
Example: You place $100,000 in an indexed interest option with a PAR rate of 50%. If the underlying index rises by 30% during the defined crediting period, your Account Value will be credited 15% (50% of the 30%) or $15,000.

Lock In Stability with a 6 Year Guaranteed Cap Rate*

Available Exclusively in the Enduris 6 Fixed Index Annuity™

This Guaranteed Cap Rate will not decrease during the 6 Year Surrender Charge period, and is available only with the Enduris 6 FIA.

Here's How It Works



Years 1 & 3

The index return is greater than the CAP Rate. Your clients receive the maximum credited rate of 8%.

Years 2 & 4

The index return is zero or negative. Your clients' money is protected from market loss, and they receive a credited rate of 0%.

Years 5 & 6

The index return is positive and less than the CAP Rate. Your clients receive a credited rate equal to the index return.

This example is hypothetical and for illustrative purposes only. It does not reflect the outcome of any actual person. Individual results may vary.

Key Features

- **Guaranteed CAP Rate:** Secured for each crediting period of the full 6 Year Surrender Charge period - no changes, no surprises!
- **Market Protection and Upside Potential:** Clients benefit from index gains up to the Guaranteed CAP rate, while being protected from market declines.

Enduris 6 FIA: Now with a 1 Year Point-to-Point with 6 Year Guaranteed CAP Rate Indexed Interest Option!

*6 Year Guaranteed CAP: Available only on the 1-Year Point-to-Point with 6 Year Guaranteed CAP Rate Indexed Interest Option, the CAP rate stays fixed during the 6 Year surrender period, which includes 6 one-year crediting periods. Afterward, it may change for future crediting periods. Funds can be allocated to this option only at Contract Issue, with no transfers or reallocations in or out allowed during the surrender period.

Understanding How EPAR Indexed Interest Options Work

If you choose to allocate funds to one of the Enhanced Participation (EPAR) Indexed Interest Options, you may be able to capture a higher percentage of growth should the S&P 500® perform strongly during the index option period.

Here's how it works

With an EPAR strategy, there are two participation rates:

- The Initial Participation Rate applies to index growth up to a designated rate (called the Index Term Change Percentage)
- The Enhanced Participation Rate applies to any index growth above the Index Term Change Percentage

Example*

If the underlying index increases by 20% in this index option period, the Index Term Change Percentage is 10%, the initial Participation Rate is 20%, and the Enhanced Participation Rate is 100%, the EPAR interest crediting percentage will be 12%.

[20% PAR X 10% INITIAL GAINS] + [100% PAR X 10% ADDITIONAL GAINS] = 12%

*This example is hypothetical and for illustrative purposes only. It does not reflect the outcome of any actual person. Individual results may vary.

EPAR Indexed Options Perform Better When the Underlying Index Experiences Higher Returns

Access to Your Money When You Need it Most

Should something unexpected happen, there are multiple ways to access your funds without triggering a Surrender Charge or MVA, including:

- IRS Required Minimum Distributions (RMDs)
- Free partial withdrawal of 10% of your account value may be withdrawn each policy year, after your first policy year
- Conversion of your annuity into a guaranteed income stream (Please review the Product Highlights page for additional information on annuitization options.)
- If you require nursing home care or become terminally ill (See Enduris Product Highlights page for more details.)
- Death Benefit amounts paid to your beneficiary

Talk with your financial professional today to determine if the Enduris FIA might be right for you.

Surrender Charges

If, before the Surrender Charge period ends, you surrender your annuity or take withdrawals in excess of the Free Partial Withdrawal Amount, a Surrender Charge may apply and reduce the amount you receive.

Surrender Charge Schedule							
Policy Year	**1**	**2**	**3**	**4**	**5**	**6**	**7**
Charge Percent	9%	8%	7%	6%	5%	4%	0%
(CA Only)	8.30%	8.20%	7.20%	6.20%	5.20%	4.15%	0%

Market Value Adjustment (MVA)

The Enduris FIA comes with a Market Value Adjustment. The MVA applies only when the Surrender Charge applies. The MVA could increase or decrease the amount you receive from Surrender or a withdrawal in excess of the free amount, depending on certain market interest rates. (Please review your contract for complete details.)

- If certain interest rates decrease, the MVA will be positive. **A positive MVA increases the withdrawal amount or Cash Surrender Value.**
- If certain interest rates increase, the MVA will be negative. **A negative MVA decreases the withdrawal amount or Cash Surrender Value.**
- The Cash Surrender Value will never be less than the Guaranteed Minimum Cash Surrender Value.

When to Consider Enduris FIA

Wanting to lock in stability and confidence

The 1 Year Point-to-Point with 6 Year Guaranteed CAP Rate Indexed Interest Option locks in a CAP Rate at contract issue that will not change during the contract period, regardless of how the S&P 500® Index performs.*

Desiring protection against early downward index movement (Best Entry feature)

If the S&P 500® declines significantly shortly after issue, the Enduris annuity adjusts your index starting value to a new lower level, enhancing your growth potential during your first index option period. (Additional details about the Best Entry feature are available on page 4 and 5.)

Wanting to capture a greater percentage of growth if the S&P 500® performs well during the index option period

If you elect to allocate funds into one of the Enhanced Participation (EPAR) Indexed Interest Options, you may be able to capture a greater percentage of growth if the S&P 500® performs well during the index option period. (Additional details about the EPAR Option is available on page 7.)

Looking for tax deferred growth

100% of your account value typically grows tax deferred; taxes on growth are not paid until you withdraw your funds.

Relying on principal protection

Your initial principal and interest credits are protected from market fluctuations.

Wanting a reliable income stream in the future

You can convert your annuity into a guaranteed income stream, in some instances as early as the 4th contract year.

* Funds can be allocated to the 1 Year Point to Point with 6 Year Guaranteed Cap Rate Indexed Interest Option only at Contract Issue, with no transfers or reallocations in or out allowed during the surrender period.

3 simple steps to determine if the Enduris 6 FIA is right for you

1

Talk with your financial professional
Unlock new possibilities and opportunities to achieve your long-term goals with Enduris.

2

Determine how much premium you want to apply to the Enduris FIA
You can purchase an Enduris FIA with a single minimum premium of $25,000 for qualified funds and $50,000 for non-qualified funds.

3

Select how you want to allocate your premium dollars
Choose any combination of fixed interest or available S&P 500® indexed interest options including Guaranteed CAP rate and Enhanced Participation Rate (EPAR) options.

Continue revolutionizing your retirement!

Enduris 6 Product Highlights

Product features at a glance

Surrender Charge Period	6 Years
Issue Ages	18 - 80 (Qualified and Non-Qualified funds)
Maximum Annuitization Age	100 years
Minimum Premium	$25,000 for Qualified Contracts, $50,000 for Non-Qualified Contracts
Maximum Premium	$1,000,000 (higher amounts will be considered and require company approval)
Annuitization Payment Options	Your Contract may be annuitized without Surrender Charge or MVA at any time after the third contract year, provided that a life contingent or period certain of 7 or more years is elected.
Fixed Interest Option	Yes. Minimum credited rate of 1% annually
Indexed Interest Options	• S&P 500® 1 Year Point-to-Point with PAR Rate • S&P 500® 2 Year Point-to-Point with PAR Rate • S&P 500® 1 Year Point-to-Point with Enhanced PAR Rate (EPAR) • S&P 500® 2 Year Point-to-Point with Enhanced PAR Rate (EPAR) • S&P 500® 1 Year Point-to-Point with CAP Rate • S&P 500® 2 Year Point-to-Point with CAP Rate • S&P 500® 1 Year Point-to-Point with 6 Year Guaranteed CAP Rate
Loans	Not Available
Free Partial Withdrawals[1]	10% of the Account Value may be withdrawn each Contract Year, after the first Contract Year, without incurring Surrender Charges or MVA.
RMDs	The Contract Owner can access required IRS Required Minimum Distributions without incurring a Surrender Charge.
Nursing Home Rider[2][3]	Surrender Charges and MVA will be waived if one of the following events occurs: • The Contract Owner becomes confined to a nursing home for at least 90 consecutive days on or after the Contract Date • The Contract Owner is confined for a total of at least 90 days if there is no more than a 6-month break in the confinement and the confinements are for related causes
Terminal Illness Rider[2][4]	Surrender Charges and MVA will be waived if: • The Contract Owner becomes terminally ill or injured in such a way that they are not expected to live more than 12 months
Death Benefit	The Accumulation Value plus any positive MVA, or Guaranteed Minimum Cash Surrender Value (if greater) • Surrender Charges do not apply to the death benefits paid. The Death Benefit will not be reduced by any negative MVA. Any positive MVA will be added to the death benefit.
Free Look Period	30 days

Important Information

[1]**The Free Partial Withdrawal Amount** is equal to the Free Partial Surrender Percentage times the Accumulation Value at the beginning of the Contract Year, less any prior partial surrenders (including any associated surrender charges and MVA) made during the Contract Year. Prior partial surrenders include any IRS required minimum distributions and are free of surrender charges. If you withdraw an amount more than this Free Partial Withdrawal Amount, you may be subject to Surrender Charges. Withdrawals of taxable amounts are subject to ordinary income tax and may be subject to a 10% federal income tax penalty if taken before age 59½.

[2]**The Terminal Illness Rider and Nursing Home Rider** are NOT long-term care insurance nor a substitute for such coverage. Riders may not be available in all states. Please see the contract for more information.

[3]**Additional information about the Nursing Home Rider:** First confinement must begin on or after the Contract Date. We must receive the withdrawal request and proof satisfactory to us at our Home Office either while the Owner is confined or within 90 days after such confinement. Confinement in a Nursing Home must be prescribed by a Qualified Physician and must be Medically Necessary. The Owner must have been the Owner of the contract continuously since the Contract Date, or a spousal Beneficiary who continued the Contract under the Settlement Options in the Contract. State variations may apply. Please read your Contract for details.

[4]**Additional information about the Terminal Illness Rider:** A Qualified Physician must certify to the Owner's illness or injury and life expectancy, and that the Owner had not been diagnosed with the terminal condition as of the Contract Date. The Owner must have been the Owner of the contract continuously since the Contract Date or a spousal Beneficiary who continued the Contract under the Settlement Options in the contract. State variations may apply. Please read your Contract for details.

Guarantees are subject to the financial strength and claims-paying ability of Revol One Insurance Company and subject to the terms and conditions of the product. Surrender and withdrawal charges may apply. Withdrawals and surrenders are subject to federal and state income tax and may be subject to an IRS penalty if taken prior to age 59 ½.
