<tr><td colspan="2">Other Crediting Strategy Information</td><td colspan="10">Mandatory “Additional Interest Credit Overlay (AICO)” provides the potential for greater credited interest on the contract.

To calculate this credit, a ‘Multiplier’ of 200% of the fixed and indexed interest earned, adjusted for withdrawals, will be credited to an “Overlay Value” at the end of a five-year period.

If the “Overlay Value” is greater than the Account Value, the difference is added to the Account Value as the "Overlay Credit.”

The “Overlay Credit” is the amount of money added to the Account Value on the 5th contract anniversary. It is equal to the Premiums Paid, less withdrawals, plus the

Lesser of:
1. 200% of the fixed and indexed interest earned over 5 years (prior to the charge being applied); or
2. 30% of the Premiums Paid, less withdrawals.

Charge of 0.80% is deducted annually from the Account Value and terminates on the contract’s 5th anniversary. This charge is based on the Premiums Paid in year one, and the contract’s Account Value on the previous policy anniversary in subsequent years. This annual charge can reduce the Account Value in years where no credited interest is earned. If the “Overlay Value” is equal to, or less than, the Account Value- the “Overlay Credit” will not be applied. In this case, the client would have paid for the potential for greater credited interest of the “Overlay Credit,” without benefiting from it.</td></tr>
